**Green Jobs for Sustainable Development**

Ana-Maria Boromisa 2015-06-26

A ‘green economy’ must be built on ‘green jobs’ - the kind of employment that is low carbon, intended to reduce energy use and expected to restore environmental quality. But attempts to define exactly what a ‘green job’ is have led to varied and often contradictory answers. There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs? Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that...
glass making is a ‘dirty’ industry? This book deals with the relationship between "green" concepts (green jobs, green economy, green growth) and sustainable development. It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing. In order to do so, general conceptual frameworks for green jobs, green economy, green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty. The selection includes advanced (the European Union, the United States of America, Australia, Canada, Republic of Korea, Japan) and developing countries (Mexico, China, Turkey and Brazil). The analysis presented in this book shows that although green concept is well-intentioned, its implementation depends on local circumstances – economic, political and social. Developed countries perceive green growth as a way to create new markets and demand, while developing countries rely more on labor intensive growth and less expensive green jobs. Thus, greening the economy does not diminish differences between rich and poor. This book is suitable for those who study and work in Ecological Economics, Sustainable Development and Labor Economics.

**Women And Microcredit In Rural Bangladesh** - Aminur Rahman 2019-05-20 The Grameen Bank of Bangladesh has been extending small loans to poor borrowers (primarily women) to promote self-employment and income generation since 1976. The apparent success of the Grameen Bank (that is, recruitment of clients, investment of loans, recovery rates on invested loans and profit margins) has made microcredit a new model for poverty alleviation and sustainable development. Anthropological research results on Grameen Bank lending to women presented in this book, however, illuminates the link between the success of the bank and debt-cycling of borrowers. The priority of earning profits to insure institutional economic viability caused Bank employees at the grassroots level to emphasize increasing the number of loans disbursed and loan recovery. By using the joint liability model of lending, the Bank workers and borrowing peers impose intense pressure on clients for timely repayment. Many borrowers maintain their regular payment schedules, but do so through a process of loan recycling (that is, pay off previous loans with new ones) that considerably increases borrower debt liability. The debt burdens on individual households in turn increase tension and anxiety among household members and produce unintended consequences for many clients. This book examines women borrowers' involvement with the microcredit program of the Grameen Bank, and the
grassroots lending structure of the bank; it illustrates the implications of Grameen lending for the borrowers, their household members and bank workers. The focus of the study is on the processes of village-level microcredit operation; it addresses the realities of the day-to-day lives of women borrowers and bank workers and explains informant strategies for involving themselves in this microcredit scheme. The study is on the power dynamics of everyday lives of informants as they affect women borrowers' relationships within the household and the loan centers, and bank worker relationships within the loan center and the bank.

More and Better Jobs in South Asia-The World Bank
2011-12-20 South Asia has created nearly 800,000 jobs per month during the last decade. Robust economic growth in large parts of the region has created better jobs -- those that pay higher wages for wage workers and reduce poverty for the self-employed, the largest segment of the region’s employed. Going forward, South Asia faces the enormous challenge of absorbing 1 to 1.2 million entrants to the labor force every month for the next two decades at rising levels of productivity. This calls for an agenda that cuts across sectors and includes improving the reliability of electricity supply for firms in both urban and rural settings, dealing decisively with issues of governance and corruption, making access to land easier for urban informal firms and strengthening transport links between rural firms and their markets. It requires improving nutrition in early childhood to avoid cognitive impairment, intensifying the focus on quality of learning in education systems, equipping workers with the skills that employers demand, and reorienting labor market regulations and programs to protect workers rather than jobs. The continuance of high economic growth to help improve job quality is not assured. But the region’s demography can provide a favorable tailwind. The growth of workers exceeds that of dependents in much of the region. The resources saved from having fewer dependents can be shifted to high-priority investments in physical and human capital accumulation necessary to create productive jobs in countries with an enabling policy framework. But the demographic window of opportunity is open for only the next three decades, a fact which lends urgency to the reform agenda. This book will be of interest to policy makers, their advisers,
researchers and students of economics who seek solutions, not only to the challenge of creating more and better jobs in South Asia but globally as well. It is the first title in South Asia Development Matters, a new series that will serve as a vehicle for in-depth synthesis of economic and policy analysis on key development topics for South Asia.

The Business Leader's Guide to the Low-carbon Economy - Larry Reynolds

2016-04-01

Rising energy prices and concerns about climate change are driving us towards a new kind of economy - a low-carbon economy. What will this low-carbon economy be like, and what does your business have to do to prosper in this new business environment? Larry Reynolds shows how successful organisations are already learning to be more energy efficient, manage their carbon footprint, adapt to climate change and become truly sustainable. As well as explaining how to future-proof your organisation against possible threats, The Business Leader's Guide to the Low-carbon Economy, tells you how to make the most of the many opportunities that the low-carbon economy will bring, especially in growing profits from new products and services. It is your guide to creating an organisation that will thrive in the twenty-first century. While there are plenty of published books about 'going green', there are none which explain the low-carbon economy and how to thrive in it. This book will fill that important gap. Drawing on examples from across industries, including businesses such as Asda, BT, Cargill, Coca Cola, Co-operative Group, Eurostar, Marks and Spencer, Tesco, Tesla, Walker's Crisps, Walmart and ZipCar, Larry Reynolds shows how today's successful organisations are already benefiting from the coming low-carbon economy.
